"PLAN TO MAKE AMERICA BEAUTIFUL"

Our free packing and prepaid delivery amounts to a very substantial discount.

Our price listings are from 20% to 40% lower than others. We are also one of the few in New York State offering Christmas tree and ornamental tree listings.

A few years ago we advised that the Christmas tree "hobby" would pay off up to \$1,000.00 per acre. We are now advising that in some instances it will pay up to \$2,000.00 per acre.

In some locations they are over-planting Scotch Pine. Many have neglected to plant the better sale varieties, such as Blue Spruce, White Spruce, Douglas Fir, etc. Many planters are now filling in their plantations with the above varieties.

It is estimated that the Christmas tree cutting will run close to 55,000,000 trees to supply American homes for the 1960 season.

*** * ***

Abandoned farms are many and can be a source of future profit in the tree farming business.

*** * ***

We thank our friends and customers for the orders that keep rolling in. Sometimes we note that about 60 or 70 percent come from former customers. We advise planting lining out trees only in the Spring of the year, and therefore do not contact our customers for the Fall season. It helps a lot if you place your orders early, as April and May orders sometimes find us with stock too depleted to fill them properly.

We have a good stock of landscape flowering shrubs, flowering lawn trees; well stocked with shade trees, evergreens, evergreen shrubs, dwarf and standard apple. We especially call your attention to our flowering crabs. We will be glad to furnish prices covering your lists.

CHOICE CHRISTMAS AND ORNAMENTAL TREE SPECIES

(Our prices are from 30% to 50% lower.)
